

F.A.Q (Part 2)
Tender No. 83462266

Tender Title: Digital Crop Advisories and Climate Risk Management Services for Mint Cropping System in Uttar Pradesh

Date: 15.04.2024

| S.No. | Query | Response by GIZ |
|--------------|--|--|
| 1 | Request if you could provide details on the kind of sensors that are expected with Pest traps. | There are no specific technical specifications from project and bidder is advised to use the equipment best suited to desired services. |
| 2 | Our understanding with regards timelines of providing digital services is that the same will end by Feb 2026. Any IT data hosting / digital services will not be required beyond Feb 2026. Request if you could confirm our understanding. | The service contract will be given until December 2025 but due to crop season the service provider has to continue services until February 2026. Further requirement of services will be notified before the end of the contract term. |
| 3 | With regard providing of crop insurance product, we would like to highlight that insurance is provided by regulated financial bodies/ agencies. As a bidder, can we suggest and facilitate in selection of the right crop insurance agency/ product which GiZ can directly contract with. Request if this could be considered. | Project is looking for full facilitation as a kind of agent to insurer and hence deliver the services directly. |
| 4 | Given the holidays and festive season, we would request if the last date for <u>submission is extended by 2 weeks</u> | Unfortunately due to onset of Kharif season, services will be required as early possible, hence project cannot extend the date of submission of the bid. |
